

Alvacat has outstanding knowledge on proprietary methods for metal oxide synthesis. Phase pure perovskites and spinels of various compositions are available. All recipes are being developed by high-throughput screening technologies.

AlvaPhosphor

Specification: 091120.1

Type : Mixed Oxide

Phase:	binary oxide
Shape:	powder
Particle size:	25 μ m
BET:	30m ² /g

Composition: Sr₂CeO₄

Besides the AlvaPhosphor standard material, also doped (customized) Sr-cerates are available upon request.

The information herein does not constitute a guarantee or warranty. Alvacat's warranty is set forth in its standard terms and conditions which govern sales of Alvacat products. The standard terms are set forth in Alvacat quotations and acknowledgements and are also available upon request.
